Hi Jen,

This is a very quick note to: (1) introduce you to Dr. Jason Fritz, an EPA toxicologist Maricel and I met last week at SOT, and (2) send you a copy of a poster he presented on formaldehyde cancer mode of action (additional EPA SOT posters can be found [here](#)). Jason is based in Washington D.C. and works closely (I believe) with Vince Cogliano.

Jason, please meet Dr. Jennifer Sass, a Senior Scientist in the NRDC health program. Jen is the lead scientist on much of our chemical reform work and has extensive expertise in domestic chemical policy and regulations.

Many thanks to you both for your time and I wish you a great evening.

Best wishes,
Kristi

Hello Maricel and Kristi,

It was a pleasure speaking with you during the NCAC mixer at SOT last week. I'm attaching a .pdf copy of our poster on the formaldehyde cancer mode of action analysis in case you were interested in reviewing it.

Thank you for your continued interest in the IRIS Division of NCEA, U.S. EPA.

Sincerely,
Jason Fritz
